

Update on GSRP Reporting in the New Michigan Student Data System (MSDS)

The Single Record Student Database (SRSD) and the new Michigan Student Data System (MSDS) include discrete information about individual children such as age, gender, race, ethnicity, and program participation. MSDS reporting will be connected to funding of the GSRP.

Regarding the requirement for all grantees to report enrolled children into the SRSD and the MSDS:

1. Submission of GSRP SRSD data during the fall reporting period is OPTIONAL.
2. Grantees MUST submit data on enrolled children in the new MSDS. The MSDS will become available sometime in November/December 2008. Data snapshot (point in time) dates are currently set for February 28, June 30 and September 30, 2009.
3. All children who receive classroom or home-based Great Start Readiness Program (GSRP) services funded through state aid, including sub-contracted programs, must be entered into the MSDS.
4. Competitive (agency) GSRPs will begin reporting this fiscal year (2008-09). Webinar training will be available. You may wish to talk with your interagency advisory group for ideas and assistance to accomplish MSDS reporting. Local schools and intermediate school districts (ISDs) have had experience inputting this data over the past few years.
5. Please visit the following website for more information and MSDS status updates: http://www.michigan.gov/cepi/0,1607,7-113-986_50502---,00.html

Grantees can expect additional guidance when the exact implementation of the MSDS is confirmed.
